JORDAN AVERY

BACKEND / SOFTWARE ENGINEER

Tel Aviv, Israel | +972 50-000-0000 | jordan.avery@example.com | linkedin.com/in/example | github.com/example

PROFESSIONAL SUMMARY

Backend Engineer with 6 years of hands-on experience: Java/Spring microservices and Kafka streaming on a data platform, then platform engineering for 14 development teams across 120 repositories. Writes production services and the CI/CD, testing and Kubernetes tooling that ships them. Wrote a technical article on zero-touch CI runner provisioning. Hands-on engineer with strong ownership.

PROFESSIONAL EXPERIENCE

Independent DevOps & AI Projects — Oct 2026 - Present

- Built an **autonomous AI agent** on **Claude Code** that runs hourly in the cloud: pulls jobs from 80+ career boards and email via **MCP connectors**, scores fit, and sends each strong match with a tailored, fact-validated CV to **Telegram**.
- Delivered a hardened Kubernetes service (Helm, k3d, Prometheus/Grafana, NetworkPolicy, PDBs) with an **agentic workflow** of Claude Code **subagents**, steered by **context engineering** (CLAUDE.md, skills, hooks).

Platform Engineer — Mar 2023 - Sep 2026

Northwind Cloud (fictional)

- Built shared GitLab CI/CD templates and a Helm chart library that cut a new service's path to production from days to under an hour.
- Founding engineer of the platform team: owned CI/CD and deployment workflows for 14 development teams across 120 repositories and their Kubernetes deployments.
- Ran self-service ephemeral environments on k3d for every merge request, with automated E2E tests.

Backend Engineer — Jun 2020 - Feb 2023

Globex Data (fictional)

- Developed Java/Spring microservices and Kafka streaming components for a data platform processing events from 30 product teams.
- Built reusable integration-testing libraries and GitLab CI pipelines covering Kafka, MongoDB and PostgreSQL services.
- Wrote Python tooling for data backfills and schema migrations.
- Moved the team's deployments from hand-run scripts to Helm on Kubernetes, with zero-downtime rollouts.

TECHNICAL SKILLS

Programming & Scripting: Java, Spring, Python, Node.js, Bash
Data & Messaging: Kafka, MongoDB, PostgreSQL, Redis
CI/CD & Automation: GitLab CI/CD, GitHub Actions, Helm
Cloud & Containers: AWS (EC2, EKS, S3, IAM), Kubernetes, Docker
AI & Agents: Claude Code, agentic workflows, subagents, MCP, context engineering

EDUCATION

B.Sc. Computer Science | Example University | 2020
